Profile

I am a dedicated JavaScript/Typescript developer with a strong focus on building robust and dynamic web applications using modern technologies like React and Next.js. I combine creativity with technical expertise to deliver efficient, elegant solutions that prioritize both functionality and user experience. With proficiency in Ionic framework, I also develop cross-platform mobile applications, ensuring seamless and responsive design across all devices. My commitment to clean code and innovative problem-solving consistently leads to results that exceed expectations.

Experience

Teckat Services
April 2024 - September 2024

Frontend Intern
Jamshedpur

🔗 https://teckat.com/

· Developed multiple mobile application UI by utilizing the Ionic Framework.

· Applied best practices in developing websites, including modular architecture, clean code, and performance optimization, resulting in scalable and maintainable websites.

· Actively identified, diagnosed, and resolved complex bugs across multiple web applications and mobile apps, improving overall stability and performance.

· Collaborated closely with the design team to create intuitive and visually appealing user interfaces using Figma.

Projects

AlumniConnect
February 2024 - April 2024

A social media app for Educational Institutions

🔗 https://alumni-connect-mitm.vercel.app/

Meant to help strengthen the educational community by providing a collaborative platform. Students can collaborate with existing or passed out students to help shape a better career.

Annadata
October 2024 - November 2024

A Food Management app

🔗 https://annadata-rk.vercel.app/

Aimed to aid food waste management by providing it to needy people via NGOs connected to this platform. Includes both Web application as well as an Android application.
